

UI Engineer + Designer

I love working with designers and engineers to build beautiful and modern webapps. Quality, interaction, and performance are important to me and the users we serve.

Professional Experience

Jan 2007 - Aug 2011

Front-end + Mobile Web Developer

FriendFinder Networks, Sunnyvale

- Build web pages from mock up designs using CSS, HTML, Javascript, jQuery, and Photoshop
- Designed and developed entire front-end for mobile version of a top website property with jQuery Mobile Framework
- Fixing bugs that have been documented by QA on Bugzilla bug tracking system
- Code web pages to be viewable in all major browsers including IE6

Apr 2007 - Feb 2010

Email HTML Developer

Electronic Arts, Redwood Shores

- Build quick-turnaround bi-monthly email newsletter templates for EA's online gaming website Pogo.com
- Create templates with standard email HTML coding guidelines, ImageReady, and Photoshop
- Freelance contractor

July 2001 - Sept 2006

Software QA Engineer

Alignent Software, Carlsbad

- Assured minimal software issues released to market by means of systematic QA testing
- Thoroughly reported and tracked software problems in issue database (we used Jira and Aardvark)
- Configuration and maintenance of VMware virtual machines and test environments

Education

June 2013 - Sept 2013

Full Stack Software Engineer

Hack Reactor, San Francisco

- Computer science fundamentals & software engineering best practices
- 13 weeks, 6 days/week, 12+ hours/day

Aug 2011 - May 2013

Web + New Media Design

Academy of Art University, San Francisco

- Completed 54/66 BFA2 units

Sept 1997 - June 2001
